

Task Manager v1.0

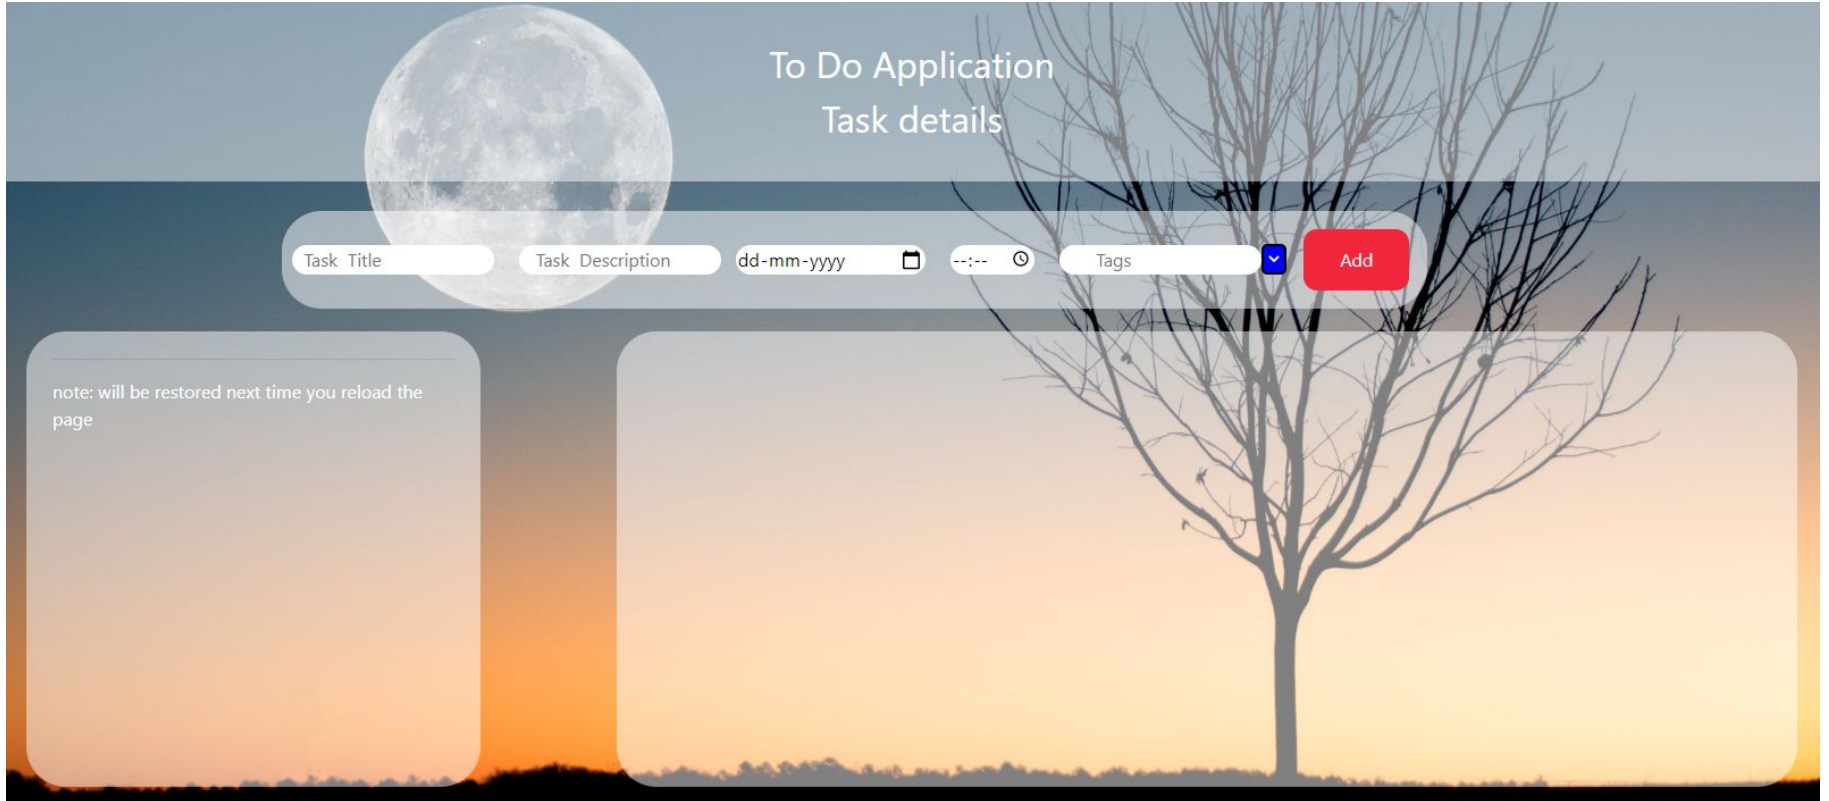

Team: BothEnds

Members: Krishanu, Manav, Yash

Tech-Stack: Mean Stack

Git-repo link: <https://github.com/krishanu-2001/MeanStack-taskmanager>

Task Manager v1.0 final product

SETTING UP

Setting up MongoDB

Set up MongoDB

(for windows)

: Download MongoDB MSI installer package

https://www.mongodb.com/download-center/community?tck=docs_server

: Install with default settings (optional)

Set up MongoDB

: Make a “data” folder to store databases (C: drive preferably)

: Make a “db” subdirectory

: Tell mongo to use this directory to store db's using in cmd ->

```
$ "C:\Program Files\MongoDB\Server\4.2\bin\mongod.exe" --dbpath="c:\data\db"
```

```
$ cd C:\
```

```
$ mkdir data
```

```
$ cd data
```

```
$ mkdir db
```

```
$ cd db
```

```
$ "C:\Program Files\MongoDB\Server\4.2\bin\mongod.exe" --dbpath="c:\data\db"
```

Setting up Nodejs

Node js installation

: Install node js from its website

Link: <https://nodejs.org/en/download/>

: Install with default options

Now that we have all basic requirement

Let's Move ahead

\$ git clone https://github.com/krishanu-2001/MeanStack-taskmanager.git

```
C:\Users\krishanu\Desktop>mkdir bothends  
C:\Users\krishanu\Desktop>cd bothends  
C:\Users\krishanu\Desktop\bothends>git clone https://github.com/krishanu-2001/MeanStack-taskmanager.git  
Cloning into 'MeanStack-taskmanager'...  
remote: Enumerating objects: 9985, done.  
remote: Counting objects: 100% (9985/9985), done.  
remote: Compressing objects: 100% (6659/6659), done.  
remote: Total 9985 (delta 2692), reused 9946 (delta 2679), pack-reused 0  
Receiving objects: 100% (9985/9985), 9.06 MiB | 4.40 MiB/s, done.  
Resolving deltas: 100% (2692/2692), done.  
Checking connectivity... done.  
C:\Users\krishanu\Desktop\bothends>_
```

Open first command prompt /
terminal /
node command prompt

Move to root folder, then

- `$ cd MeanStack-taskmanager`
- `$ cd project`
- `$ cd contactlist`
- `$ npm install`
- `$ node index.js`

something like this...

```
C:\Users\krishanu\Desktop\bothends>cd MeanStack-taskmanager
C:\Users\krishanu\Desktop\bothends\MeanStack-taskmanager>cd project
C:\Users\krishanu\Desktop\bothends\MeanStack-taskmanager\project>cd contactlist
C:\Users\krishanu\Desktop\bothends\MeanStack-taskmanager\project\contactlist>npm install
[██████████.....] | extract:nodemon: verb lock using C:\Users\krishanu\AppData\Roaming\npm-cache\_locks\staging-cfe8
```

Now your server is up and running at localhost:3000

```
C:\Users\krishanu\Desktop\bothends\MeanStack-taskmanager\project\contactlist>node index.js
(node:55820) DeprecationWarning: current URL string parser is deprecated, and will be removed in a future version. To use the new parser, pass option { useNewUrlParser: true } to MongoClient.connect.
(node:55820) DeprecationWarning: current Server Discovery and Monitoring engine is deprecated, and will be removed in a future version. To use the new Server Discover and Monitoring engine, pass option { useUnifiedTopology: true } to the MongoClient constructor.
Server started at port: 3000
Connected to mongo db ok
```

Open second command prompt /
terminal /
node command prompt

Again move to root folder, then

- `$ cd MeanStack-taskmanager`
- `$ cd project`
- `$ cd contactlist`
- `$ cd client`
- `$ npm install`
- `$ npm start`

Something like this...

```
C:\Users\krishanu\Desktop\bothends>CD MeanStack-taskmanager
C:\Users\krishanu\Desktop\bothends\MeanStack-taskmanager>cd project
C:\Users\krishanu\Desktop\bothends\MeanStack-taskmanager\project>cd contactlist
C:\Users\krishanu\Desktop\bothends\MeanStack-taskmanager\project\contactlist>cd client
C:\Users\krishanu\Desktop\bothends\MeanStack-taskmanager\project\contactlist\client>npm install
[██████████.....] - extract:wrappy: sill tarball trying faye-websocket@0.11.3 by hash: sha512-D2y4bovYpzziGgbHYtGCMj
```

Now your web app is up and running at localhost:4200

After a series of compilations you should see

```
chunk {main} main.js, main.js.map (main) 42.3 kB [initial] [rendered]
chunk {polyfills} polyfills.js, polyfills.js.map (polyfills) 141 kB [initial] [rendered]
chunk {runtime} runtime.js, runtime.js.map (runtime) 6.15 kB [entry] [rendered]
chunk {scripts} scripts.js, scripts.js.map (scripts) 146 kB [entry] [rendered]
chunk {styles} styles.js, styles.js.map (styles) 1010 kB [initial] [rendered]
chunk {vendor} vendor.js, vendor.js.map (vendor) 3.49 MB [initial] [rendered]
Date: 2020-05-29T07:46:27.868Z - Hash: e6c4ba8964ac9350a8e3 - Time: 46561ms
** Angular Live Development Server is listening on localhost:4200, open your browser on http://localhost:4200/ **
: Compiled successfully.
```

Goto localhost:4200 in browser

Le tour de functionality

Input fields and add button

To Do Application
Task details

breakfast set breakfast table for fri 19-06-2020 03:06 always Add

laundry
